LEARN MORE ABOUT HOW MAPS ARE USED IN WISCONSIN STATE GOVERNMENT

Explore the innovative ways in which maps are used to improve government operations. This event will give Wisconsin Legislators and their staff an opportunity to see the latest projects of many mapping professionals.

Maps and GIS (Geographic Information Systems) have become an integral tool in state agencies and local governments where they are used to support smarter decision making.

WHY USE MAPS & GIS?

- Share information with the citizens of Wisconsin
- Prepare for and respond to emergencies
- Understand environmental issues
- Identify health trends (e.g., flu tracking)
- Reapportion districts every ten years
- Support Economic Development
- Use government resources efficiently

SCHEDULE OF PRESENTORS

10:30 - Chief Information Officer David Cagigal

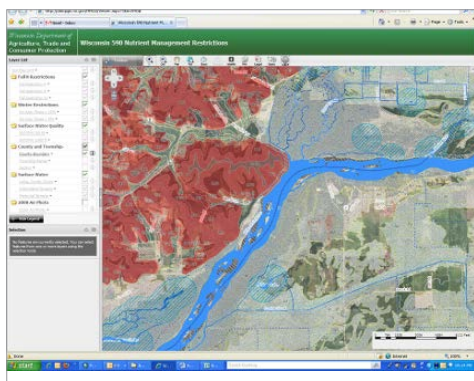

11:10 - Department of Health Services

11:40 - State Cartographer's Office

1:20 - Legislative Technology Services Bureau

1:40 - Dept. of Agriculture, Trade, and Consumer Protection

2:20 - Department of Natural Resources

WHO SHOULD ATTEND?

Many decisions in government involve people and places - basic geography! This event is for policy-makers with an interest in using modern geographic tools and information to solve problems. Come listen to a series of interesting presentations, speak with agency mapping experts, and learn more about how agency programs are working smarter for our citizens.

AGENCIES IN ATTENDANCE

Geographic Information Office; Public Service Commission; Department of Military Affairs; Department of Revenue; Department of Administration; Board of Commissioners of Public Land; Department of Health Services; State Cartographer's Office; Department of Agriculture, Trade and Consumer Protection; Department of Natural Resources, Wisconsin Land Information Association, Legislative Technology Services Bureau
