

WHAT IS SAGIC?

The State Agency Geospatial Information Committee (SAGIC) is a business-driven group that works for the standardization, development, documentation, accessibility, and governance of state agency spatial data.

SAGIC consists of geospatial staff from Wisconsin state agencies. The committee fosters collaboration between agencies and other organizations to recognize the value of geospatial data and tools and broaden their use.

STATE AGENCIES

Most state agencies use GIS in their everyday work, including:

Department of Health Services (DHS)
Department of Transportation (DOT)
Department of Natural Resources (DNR)
Legislative Technology Services Bureau (LTSB)
Public Service Commission (PSC)
Wisconsin Historical Society (WHS)

...and many more!

OUR ACTIVITIES

Issues that SAGIC GIS staff tackle include:

Open Data Access
Emergency Management
Broadband Mapping
Researching the Opioid Crisis
Global Pandemic Response
Documenting Archaeological Sites...

...and many more!

WHAT DO MEMBERS SAY?

"Participation in SAGIC has increased LTSBs awareness of geospatial activities and resources across the state and aided in easy connections to GIS staff across many state agencies. This has greatly increased and expedited the level of service that LTSB is able to provide its customers."

-Wisconsin Legislative Technology Services Bureau (LTSB)

By collaborating and cooperating with other state agencies through SAGIC, WisDOT acknowledges many benefits including... raised awareness and sharing of GIS data across agencies to provide authoritative data sources, avoiding duplication of GIS data collection efforts, and integrating lessons learned from other agencies and identify risks to WisDOT when adopting new GIS technologies or upgrading existing GIS systems.

-The Wisconsin Department of Transportation (WisDOT)
